

ALI RASHID

SENIOR SOFTWARE ENGINEER | FULL STACK MOBILE & WEB

React Native • Expo • React Web • Node.js • Mobile Architecture • FinTech

Dubai, UAE | +971 50 8373279 | ali.rashed@live.com | abaan.dev | linkedin.com/in/malirashed | github.com/m-ali-rashid

PROFILE

Senior Software Engineer with 9+ years in software development and 6+ years building React Native apps for iOS and Android. Lead mobile architecture, delivery, release quality, and mentoring for customer-facing journeys in regulated banking. Full stack experience includes React web applications, Node.js/Express services, REST and GraphQL integrations, WebSocket updates and production deployment. Hands-on with Expo, TypeScript, navigation, Redux Toolkit, Zustand, automated testing and CI/CD. Work closely with product, design, backend and QA teams to ship reliable mobile and web experiences.

CORE EXPERTISE

Mobile engineering

React Native (iOS/Android), Expo, TypeScript, JavaScript ES6+, React Navigation, RTL/Arabic, native and third-party SDK integration

Full stack and APIs

React web, Gatsby, Node.js/Express, REST, GraphQL, Firebase/Firestore, WebSockets, secure SSO

Delivery and platforms

CI/CD, GitHub Actions, Bitbucket Pipelines, iOS/Android builds, App Store and Google Play releases, Linux deployment, AWS exposure

Architecture and state

Modular mobile architecture, reusable components, Redux, Redux Toolkit, RTK Query, Zustand, Context API

Quality and performance

Jest, React Native Testing Library, Detox E2E, code review, mobile debugging, rendering optimization, AppDynamics

Leadership and product

Mobile technical leadership, mentoring, architecture decisions, Agile/Scrum, product/design/backend collaboration, production support

PROFESSIONAL EXPERIENCE

RAKBANK | Dubai, UAE

Jan 2026 - Present

Sr. Lead Software Engineer – Oxygen | Mobile Lead

- Lead architecture and delivery for a production banking app, defining reusable mobile patterns, module boundaries and API integration approaches across frontend, middleware and backend teams.
- Guide React Native implementation, native and third-party SDK integration, code reviews, automated testing, debugging, performance and release quality across iOS and Android.
- Work with product, design, QA and backend teams to resolve cross-system issues and take features from requirements through production support.
- Mentor engineers on maintainable architecture, testing practices and ownership; review technical approaches and help set engineering standards.
- Built a Python delivery tracker using Azure DevOps APIs to surface defect ownership, aging, reassignments and reopen rates, improving visibility into blockers and defect churn.

RAKBANK | Dubai, UAE

Aug 2024 - Jan 2026

Sr. Frontend Engineer – Credit Cards | Mobile Lead

- Led React Native architecture, implementation, API integration, testing and release readiness for the Cards domain across iOS and Android.
- Delivered Credit Limit Increase, Balance Transfer, Smart Cash, card onboarding and KYC journeys; simplified flows and reduced service calls by approximately 30%.
- Coordinated frontend, experience-layer, middleware and third-party integrations; handled production issues and maintained reliable customer journeys.

- Delivered real-time balances and digital card controls; mentored 3 junior engineers and led code reviews, test coverage and release preparation.

Jun 2022 - Aug 2024

RAKBANK | Dubai, UAE

Frontend Developer – React Native

- Contributed to the Bitpanda integration in the RAKBANK app, implementing secure SSO and cryptocurrency trading and asset data experiences through third-party APIs.
- Implemented facial recognition and OCR-based identity verification, including native SDK integration, application state, errors and secure onboarding flows.
- Increased automated test coverage from near zero to over 90% with Jest and React Native Testing Library; added Detox E2E coverage and supported React Navigation v4 to v6 migration.
- Delivered Arabic RTL support and reusable cross-platform UI patterns; investigated platform-specific behavior and performance issues.

Beyond Sport | Copenhagen, Denmark

Mar 2021 - May 2022

Full Stack Developer – React Native | React | Node.js

- Built and shipped a greenfield React Native app for iOS and Android alongside React web experiences and an internal admin dashboard, from design through production release.
- Designed Node.js/Express services, REST API integrations and WebSocket live updates; owned Ubuntu/Hetzner deployment, SSL, release pipelines and production maintenance.

Legently Sports | Stockholm, Sweden

Jan 2021 - Mar 2021

Gatsby.js Developer – React

- Built a responsive React/Gatsby web product with Sanity.io, GraphQL and Sass, using reusable components and API-driven content.

myRide | Massachusetts, USA

Nov 2020 - Mar 2021

React Native Developer

- Built a cross-platform vehicle interface integrating ROS APIs and real-time monitoring.

Earlier Experience: Truzon Software - Full-Stack Developer (React/Node.js) • Arjus Developers - Web Developer • iCaps - Web Development / IT Instructor

AI AWARD & CERTIFICATIONS

- **RAKBANK AI Hackathon - 1st Prize | 2023:** Core team member on “Synthetic Data Generation & Secure Sandbox,” contributing Python-based components for safer testing of banking workflows without exposing real customer data.
- **Generative AI for Software Developers - Microsoft | 2026:** GitHub Copilot, generative AI, prompt engineering, AI-assisted testing, documentation, code review, and developer workflow optimization.
- **AI for Brainstorming and Planning - Google | 2026:** Applied Gemini Deep Research to synthesize multi-source information into actionable technical plans and roadmaps.
- **AI for Research and Insights - Google | 2026:** Applied NotebookLM to complex project documentation, research synthesis and architectural dependency analysis.

EDUCATION

B.Sc. (Hons.) Computational Physics | University of the Punjab, Lahore, Pakistan | 2004 - 2008
