PERSONAL

Senior Software Engineer with 9 years of software development experience across web and mobile, including enterprise digital banking delivery at RAKBANK. Hands-on with React.js, TypeScript, JavaScript ES6+, Next.js, Redux Toolkit, REST APIs, and Micro Frontends. Developed domain-based Micro Frontends for the Oxygen project and led architecture, integration, testing, and release quality for complex customer journeys.

CORE EXPERTISE

- **Frontend:** React.js, TypeScript, JavaScript ES6+, Next.js, HTML5, CSS3, Sass, Gatsby, responsive UI, reusable components
- **Architecture and state:** Micro Frontends, domain boundaries, modular architecture, Redux, Redux Toolkit, RTK Query, Zustand, Context API
- **APIs and mobile:** REST, GraphQL, Node.js/Express, React Native, Expo, Arabic RTL, native SDK integration
- **Quality and delivery:** Jest, React Native Testing Library, Detox, Git, CI/CD, GitHub Actions, Bitbucket Pipelines, Azure DevOps, AppDynamics
- **AI and leadership:** GitHub Copilot, generative AI, prompt engineering, mentoring, code reviews, cross-team delivery, production support

PROFESSIONAL EXPERIENCE

RAKBANK | Dubai, UAE | Jan 2026 - Present
Senior Software Engineer - Oxygen Greenfield migration

- Developed Micro Frontends for Oxygen, separating loans, payments, cards, accounts, crypto, and personal information into domain-based frontend modules with clear responsibilities.
- Led architecture and delivery for a production banking app, defining reusable UI patterns, module boundaries, and API integration approaches across frontend, middleware, and backend teams.
- Guided React Native implementation, SDK integration, code reviews, automated testing, debugging, performance, and release quality across iOS and Android.
- Partnered with product, design, QA, and backend teams to resolve cross-system issues and deliver features from requirements through production support; mentored engineers on architecture and testing.
- Built a Python delivery tracker using Azure DevOps APIs to surface defect ownership, aging, reassignments, and reopen rates, improving visibility into blockers and defect churn.

RAKBANK | Dubai, UAE | Aug 2024 - Jan 2026
Senior Frontend Engineer - Credit Cards

- Led Cards domain architecture, implementation, API integration, testing, and release readiness across iOS and Android.
- Contributed to Bitpanda integration, implementing secure SSO and cryptocurrency trading and asset data experiences through third-party APIs.
- Delivered Balance Transfer, Smart Cash, card onboarding, and KYC journeys, reducing service calls by approximately 30%.
- Coordinated frontend, experience-layer, middleware, and third-party integrations; resolved production issues and delivered real-time balances and digital card controls.

- Mentored 3 junior engineers and led code reviews, test coverage, and release preparation.

RAKBANK | Dubai, UAE | Jun 2022 - Aug 2024
Frontend Developer - React Native | React JS

- Developed cards and accounts onboarding journey
- Increased automated test coverage from near-zero to over 90% with Jest and React Native Testing Library; added Detox E2E coverage and supported the React Navigation v4-to-v6 migration.
- Delivered Arabic RTL support and reusable cross-platform UI patterns; investigated platform-specific behavior and performance issues.

Beyond Sport | Copenhagen, Denmark | Mar 2021 - May 2022
Full Stack Developer - React Native | React | Node.js

- Built and shipped a greenfield React Native app alongside React web experiences and an internal admin dashboard, from design through production release.
- Designed Node.js/Express services, REST API integrations, and WebSocket live updates; owned Ubuntu/Hetzner deployment, SSL, release pipelines, and production maintenance.

Legently Sports | Stockholm, Sweden | Jan 2021 - Mar 2021
Frontend Developer - React | Gatsby | GraphQL | React Native | SASS

- Owned end-to-end project delivery as the sole developer, covering requirements gathering, project planning, UI/UX design, frontend development, and release coordination.
- Developed a responsive website using React.js, Gatsby.js, Tailwind CSS, Sass, and reusable UI components.
- Integrated Sanity.io CMS and GraphQL to manage structured content and populate website pages.
- Managed stakeholder communication, project priorities, and delivery milestones.

myRide | Massachusetts, USA | Nov 2020 - Mar 2021
Mobile Developer - React Native | ROS Integration

- Developed a cross-platform React Native demo application for a self-driving vehicle, integrating Robot Operating System (ROS) APIs.
- Built mobile interfaces to display vehicle status and real-time monitoring data received through ROS integrations.
- Implemented API-driven UI updates to reflect changes in vehicle data within the application.

Truzon Software | Lahore, Pakistan | Jul 2018 - Oct 2020
Full Stack Developer - React | Tailwind | Node.js

- Developed web and mobile applications for travel agencies using React.js, React Native, Node.js, and REST API integrations.
- Built Travel Professionals Club, a networking platform for IATA-approved travel agencies to exchange documents and business information.
- Implemented agency registration, IATA accreditation data capture, document uploads, profile verification, and administrator approval workflows.
- Developed agency directory search and filtering, connection requests, messaging, and notifications.

ARJUS Developers | Lahore, Pakistan | Dec 2016 - April 2018
Web Developer - HTML | CSS | React | Bootstrap

- Developed frontend interfaces for trading platforms using React.js and React Native, including dashboards, trading workflows, and backend API integrations.
- Built a hospital administration dashboard using React.js, featuring interactive charts, doctor profiles, patient records, scheduling, and API integration.
- Developed responsive business and engineering portfolio websites and internal administration interfaces with reusable UI components, searchable data tables, filtering, and API-driven content.

iCAPS - Institute of Computer and Professional Sciences | Pakistan | Nov 2014 - May 2016
Web Developer / IT Instructor - HTML | CSS | PHP | MYSQL

- Taught IT fundamentals, Microsoft Office, web development, and graphic design through practical lessons and hands-on exercises.
- Created and maintained the institute's internal administration panel to support administrative operations.
- Guided students in website development, graphic design, and Microsoft Office projects, providing technical support and feedback.

AI AWARD AND CERTIFICATIONS

RAKBANK AI Hackathon - 1st Prize | 2023
Core team member on **Synthetic Data Generation and Secure Sandbox**, contributing Python components to generate synthetic data and support testing of banking workflows without exposing real customer data.

Generative AI for Software Developers - Microsoft | 2026
Applied **GitHub Copilot and prompt engineering** to code generation, refactoring, test development, documentation, and code review, with developer validation of generated outputs.

AI for Brainstorming and Planning - Google | 2026
Used **Gemini Deep Research** to research technical approaches, compare implementation options, and develop structured engineering plans.

AI for Research and Insights - Google | 2026
Used **NotebookLM** to analyze project documentation, understand architectural dependencies, and consolidate technical findings for development and troubleshooting.

EDUCATION

B.Sc. (Hons.) Computational Physics | University of the Punjab, Lahore, Pakistan

Developed **computational physics simulations using Mathematica, C++, and C#,** applying numerical methods to model and visualize physical systems.

Developed a **physics-based projectile game** featuring parabolic trajectories and collision mechanics, similar to Angry Birds.

FINAL PROJECT:
Quantum Tunneling and Transmission Phase Analysis: Developed a graphical simulation of quantum wave propagation through potential barriers, evaluating the transmission-induced phase shift relative to free propagation using Mathematica and C++.
